

Francisco Pazos

FULL-STACK SOFTWARE ENGINEER

Building business-critical web applications and vendor integrations. Experienced with React, Node.js, Express, SQL, REST APIs, and client-facing technical delivery. Entrepreneurial background with strong ownership, communication, and product problem-solving skills.

Experience

Software Engineer

Mediaquery / PayCargo | 2024 - Present

- Embedded in PayCargo's international engineering team, developing features for the industry's leading online logistics payment platform.
- Develop full-stack features using React, Node.js, Express and SQL; contributed to the legacy Angular-to-React migration.
- Adhered to Agile methodology throughout the development process.
- Currently part of the Integrations squad, building vendor integrations tailored to each partner's API, fee retrieval logic and business requirements.
- Work directly with clients and stakeholders to interpret business needs, clarify constraints and deliver practical technical solutions.
- Proactively helped modernize the team's engineering workflow by introducing Claude Code, AI-assisted development, agentic coding practices and spec-driven implementation.

Founder

Star Wash | 2017 - 2024

- Founded a top car detailing business in southern Madrid, owning operations and growth.
- Experienced 30-40% revenue growth in the first three years before the 2020 pandemic.
- Implemented client and service management software to create a comprehensive database.
- Effectively managed a skilled team of professionals.
- Enhanced problem-solving skills during this process.

Front-End Developer

Servicap Luxury Consulting | 2016

- Built and maintained front-end experiences, supporting content workflows, translation and digital platform updates.

Online Economic Content Specialist

Thomson Reuters | 2013 - 2015

- Content creation, editing, and translation focusing on economics

Personal Projects

Mentalia (HackShow Award Winner)

A mental well-being app that offers a mood tracker to monitor emotions, facilitates access to psychologists, and provides a community platform for sharing ideas and experiences among users.

Adulting.app

Personal and family finance management app for budgeting, expense tracking and household planning.

Parnassus

Book club management platform for organizing groups, readings and club activity

Education

Ironhack

Software Engineering | 2024

- Development of MERN stack web applications
- Building APIs and leveraging REST API functionality
- Hackshow winner.

Universidad Complutense

Bachelor in Information and Communication Science | 2009 - 2014

Certificate of Proficiency in English (C2) | University of Cambridge
